

Harshith N

Cybersecurity Engineer · Ethical Hacking · Penetration Testing

Bengaluru, India | harshith3056@gmail.com | linkedin.com/in/harshith-n-b77209307

ABOUT ME

Results-driven cybersecurity professional with hands-on expertise in penetration testing, vulnerability assessment, and network security. Proven track record in competitive hacking environments, achieving **Top 10 rankings both nationally and globally**. Passionate about breaking systems to understand them deeply — and rebuilding them stronger. Currently pursuing a B.E. in ECE while staying ahead of the threat landscape.

SKILLS

Security	Pen Testing · Vulnerability Assessment · Network Security · Ethical Hacking
Networking	TCP/IP · IP Networking · Protocol Analysis · Network Monitoring
Tools	Metasploit · Nmap · Burp Suite · Wireshark · Linux
Programming	Python · Bash · Automation
Other	Postman / API Testing · System Debugging · Security Research · CTF

PROJECTS & EXPERIENCE

Home Cybersecurity Lab

Ongoing

Independent Research Project

- Designed and deployed a headless virtualized lab for controlled attack simulations, vulnerability scanning, and real-time network monitoring.
- Replicated real-world attack scenarios with industry-standard tools to sharpen both offensive and defensive skills.
- Used the lab as a launchpad for CTF prep — turning theory into repeatable, documented exploits.

CTF Competition Achievements

2023 – Present

Pwntilldawn · HackTheBox

- Top 10 in India** on Pwntilldawn across web exploitation, binary analysis, and reverse engineering categories.
- Top 10 globally** on HackTheBox — demonstrating advanced skills in privilege escalation, exploit development, and enumeration.
- Achieved **'Hacker' rank** on HackTheBox, reflecting consistent, high-quality practical exploitation performance.
